SUMMARY

Software engineer with experience in **React**, **Node.js** and **test-driven development**. Responsible for continuous integration and delivery, with strong experience in **DevOps**. Very self-motivated to learn software development knowledge from nothing to proficiency.

WORK EXPERIENCE

Solution Architect, [Computacenter](#) | Toronto, ON | Feb 2025 - now

- **Took ownership of the CloudCheckr deliverable** in the OEMCM project, coordinating between product owners, vendors and the client, ensuring on-time delivery and reducing project turnaround by **20%**

Operator, [Accelerated Global Solutions](#) | Mississauga, ON | Apr 2024 - Feb 2025

Software Engineer, [Storeforce](#) | Toronto, ON | Aug 2022 - May 2023

.Net / TypeScript (React) / JavaScript (KnockoutJS) / Xamarin / React Native / SQL / Azure DevOps / GCP

- Spearheaded project execution for a web application with **React** and utilizing **Azure Boards** for task tracking to improve ticket supporting rate, increasing customer satisfaction by **30%**
- Rewrote the SQL queries in the **stored procedures** to enhance the performance of the app in the querying and thus eliminated the cost in running the database by \$1000+
- Developed main components of the Xamarin mobile application and revamped an old application to **React Native** mobile application, streamlining the data handling and cutting response time by 1 minute
- **Implemented unit testing** to ensure code reliability and support continuous integration/continuous delivery (CI/CD) development

Software Engineer, [Cable Television](#) | Sep 2021 - Jun 2022

Node.js / TypeScript (React) / PHP / Wordpress / GraphQL / MySQL / AWS

- Archived system integration for a microservices architecture leveraging **Docker and Kubernetes** to handle 1 million+ user visits
- Redesigned a mobile app with **React Native** and **GraphQL** to increase company revenue by 20% in the easier subscription of company services
- Facilitated **cloud technologies** adoption by migrating the applications to **AWS**, achieving a **20% reduction in operational costs**
- **Developed and optimized complex data sets**, improving processing speed by **35%** through SQL indexing while maintaining data integrity using **transactions and constraints**

Backend Engineer, [Ecosa](#) | Jun 2021 - Aug 2021

PHP / MySQL / JavaScript (Vue) / PrestaShop / AWS

- Improved the **search function** performance in CMS to **reduce the SQL query execution time** in the relational database by **40%**
- Developed a **notification function** for weekly shipments to keep track on stock capacity
- Diagnosed and troubleshoot server issues for the high-traffic web applications utilizing tools, **reducing system downtime by 30%**

Civil Engineer, [Meinhardt](#) | Nov 2019 - Jan 2021

Assistant Civil Engineer, [Atkins](#) | Sep 2018 - Oct 2019

EDUCATION

Tecky Academy Feb 2021 - Jun 2021

Bachelor of Engineering, Civil Engineering, Hong Kong University of Science and Technology Sep 2014 - Jun 2018

PROJECTS

TTC ETA Tracker (Github) - a website for users to check the TTC (Toronto Transit Commission) estimated time arrival

SKILLS

- Frameworks: React, Redux, NextJS, Vue, Node.js, Express, NestJS, RESTful APIs, GraphQL, Spring Framework, .Net
- Database: PostgreSQL, MySQL, MongoDB
- DevOps and Cloud: Docker, GitHub Actions, Gitlab CI, AWS, Azure DevOps
- Others: Java, C#, TypeScript, JavaScript, Python, Git, HTML, CSS

LANGUAGES - English (Fluent), Cantonese (Native), Mandarin (Fluent)
